has successfully implemented the above mentioned environmental management system according to the standard and applies it effectively. The conformity was certified by peer review and inspected during the certification audit documented in audit report number A20120216. This certificate is only valid in connection with the successful performance of the surveillance audits.

This certificate is valid from: 13th March 2012
Date of the first certification: 13th March 2012
This certificate is valid until: 12th March 2015

A handwritten signature in black ink, appearing to be "M. H. K.", written over a horizontal line.

Confirmed by:

Quality Designee

Title:

About ISO 14001:

ISO 14001:2004 is a standard developed by the International Organization for Standardization. The standard specifies requirements for an Environmental Management System which enable an organization to develop and implement an environmental policy and objectives which take into account legal requirements and other requirements to which the organization subscribes, and information about significant environmental aspects. It applies to those environmental aspects that the organization identifies as those which it can control and those which it can influence. The Standard does not itself state specific environmental performance criteria. This certificate represents BioZone Scientific International Inc.'s (BSI) confirmation that BSI's established, implemented, maintains and continues to improve an environmental management system in conformance with BSI's environmental policy and the ISO 14001:2004 Standard.
